

## easiPush™

A first in the industry, Hunter's multi-use vehicle pusher will enable you to move any large, heavy or awkward sized vehicle single handily in a busy working environment!

'easiPush' is the perfect partner as it saves on labour and time when needing to free up workshops space because of a 'dead' vehicle. Once you have one you won't want to be without it!

### Information

Push up to 20 tonnes

Rechargeable battery

Easily move light commercials,  
SUV's, Pickups even HGV's and buses

"I've never seen anything like it before and I was really surprised that it could move a bus. We've got over 110 buses on our fleet, each weighing in excess of 10 tonnes and it's not uncommon for one which cannot be driven, to need repositioning around the workshop. In the past, we've got a team of guys to physically push it, but now with the easiPush, just one person can move a vehicle on their own, much more safely and easily."

Stuart Eyre, Engineering  
Manager - Arriva buses
