

Commercial Tyre Changing

NEW

TCX625HD

The Hunter TCX625HD commercial vehicle tyre changer provides high performance wheel servicing for truck & bus wheel/tyre assemblies.

It's unique mount and demount mechanism, makes short work of big tyres and its compact design welcomed in any workshop.

TULIP STYLE CLAMP

- Quick and easy clamping
- No damage to wheels
- Raises to working height

SINGLE CONTROL BOX

- All-in one control
- Pivots for ease of access and operation

BEAD BREAKING ROLLERS

- Quickly and effectively breaks the tyre beads
- No wheel damage

HYDRAULIC CARRIAGE

- No lifting of wheel assembly
- Positions wheel with ease

Big changes ahead !

PRO-ALIGN

Commercial Tyre Changer TCX625HD

Commercial Tyre Changing

WHEEL SIZES

- Services standard truck/bus tyres as well as super singles

ACCESSORIES

- Standard hook attachment
- Aluminium Wheel Clamp

The TCX625HD has been specifically selected following demand from our customers. Hunter is renowned for robust build quality and powerful performance, but is also designed to make your job easier - a simple, quick and efficient solution to removal and replacement of commercial vehicle tyres. A truly user friendly workshop companion!

*Chris Ivory
Product Manager*

Easy demounting...

Step 1 - Roll wheel onto carriage and move carriage inwards

Step 2 - Clamp wheel and raise to height

Step 3 - Loosen beads using special roller and lube

Step 4 - Simply slide the carriage and spin the tyre, rolling both beads off the rim

Job done!

...and mounting

Step 1 - Roll tyre onto carriage

Step 2 - Position wheel pliers and roll first bead on to rim

Step 3 - Reposition pliers and roll second bead onto rim

On certain tyres it is possible to mount both beads simultaneously
